

HELP US IDENTIFY YOUR SERVICE LINE MATERIAL

Identification Procedure

Locate the water service line coming into the house, this is typically found in the basement. An inlet valve and the water meter are installed on the pipe after the point of entry.

Identify a test area on the pipe between the point where it comes into the house and the inlet valve. If the pipe is covered or wrapped, expose a small area of metal. Use the flat edge of a screwdriver or other tool to scratch through any corrosion that may have built up on the outside of the pipe.

Piping Material At Point of Entry (POE)

- Plastic
- Galvanized
- Copper/Brass
- Lead

Name: _____

Address: _____
