- Project Summary
- Questions

Project Team

- Blake McNutt, Public Relations
Bmcnutt@Hartselleutilities.org (Hartselle Utilities)
- Dustin Chambers, Engineering Service Manager
Dchambers@hartselleutilities.org (Hartselle Utilities)
- David Taylor, Sewer Superintendent
DTaylor@hartselleutilities.org (Hartselle Utilities)
- Jackson Hughes, Vortex Services
jhughes@vortexcompanies.com (Vortex)

Project Overview

- Vortex Services, a Hartselle Utilities–certified contractor, will start Sewer rehabilitation work, which includes heavy pipe bursting on the Basin N,G,K,I Interceptor.
- Replace and repair our aging pipes as part of our comprehensive sewer rehabilitation program.
- Correcting structural deficiencies in sewer mains that may contribute to sewage overflows, including upsizing pipe to handle heavier flows to prevent overflows.

Project Overview

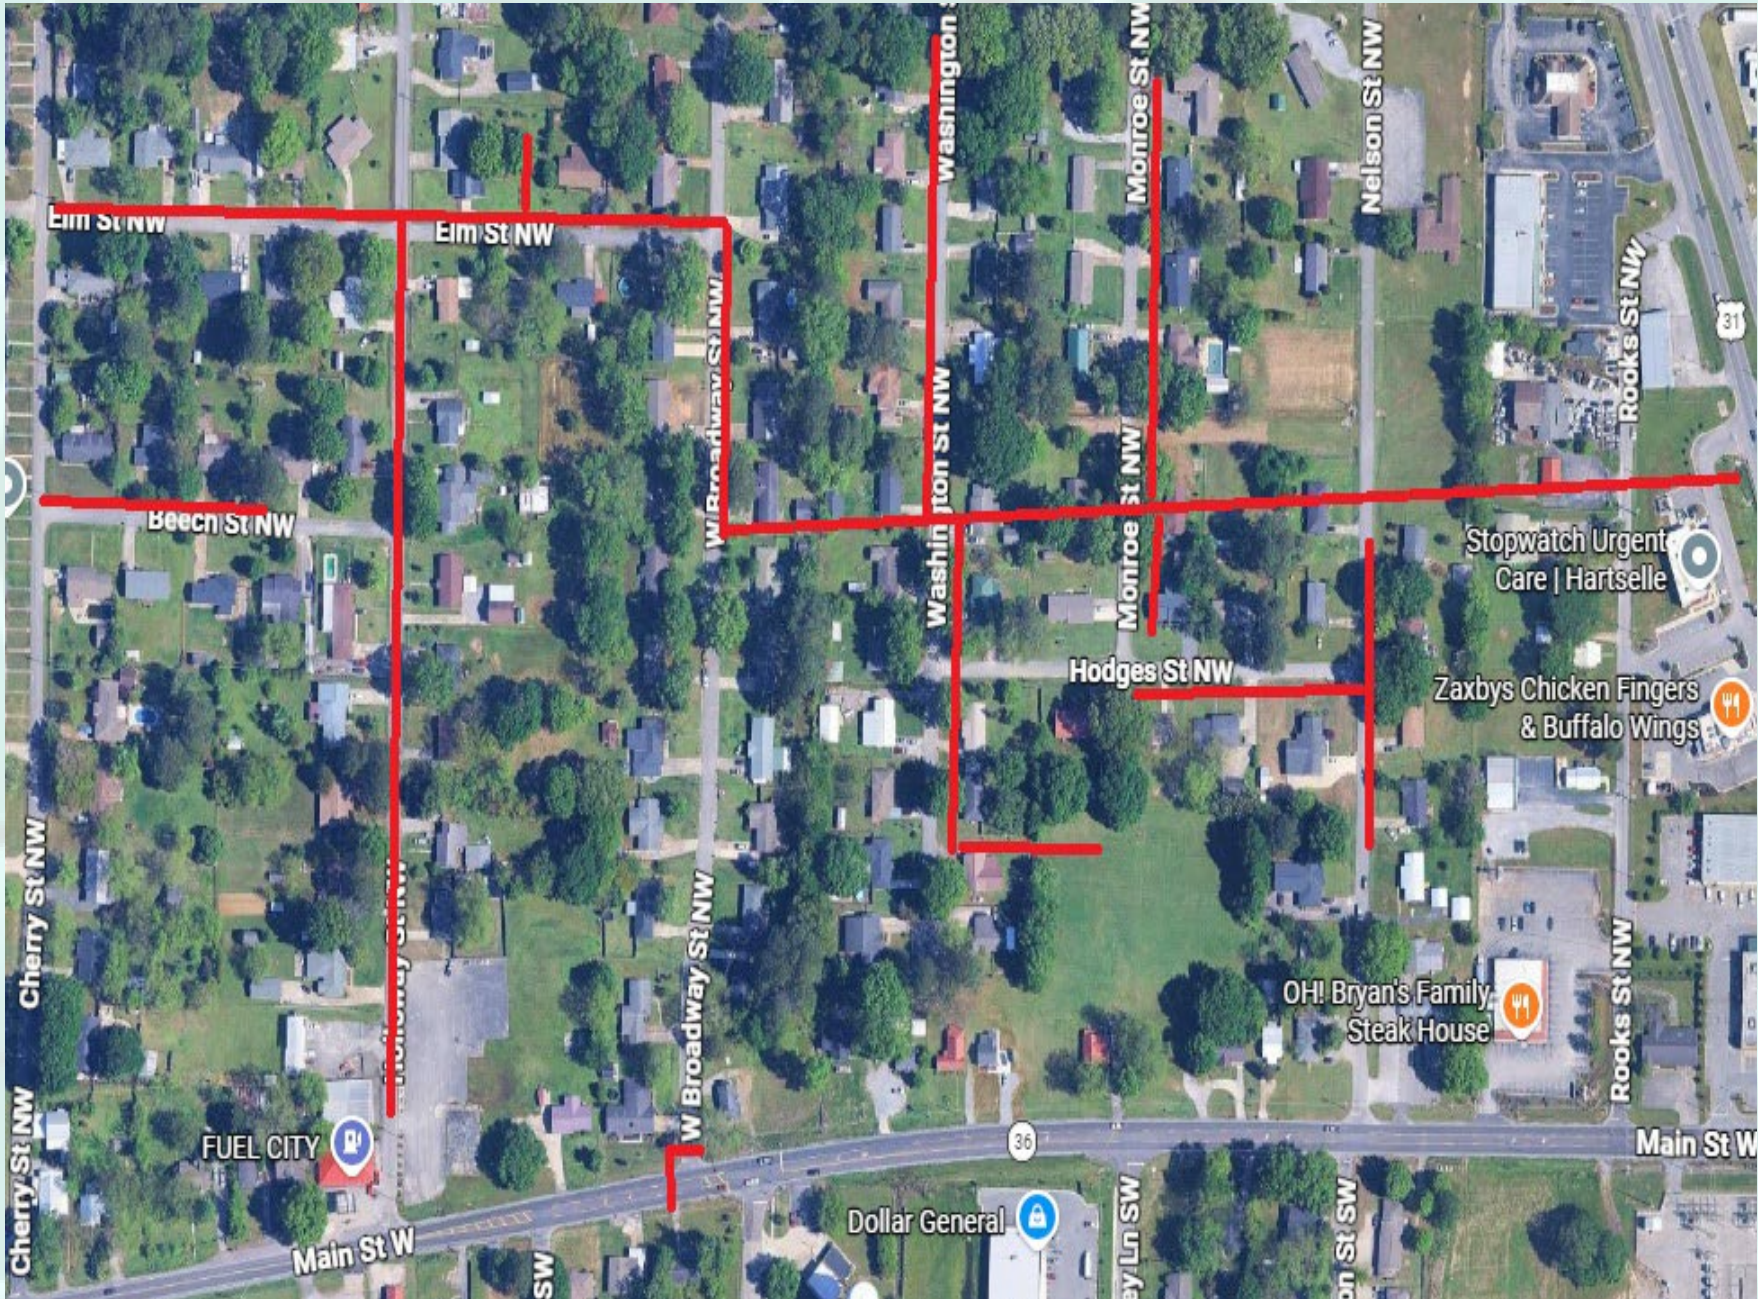

- This project includes the rehabilitation or replacement of approximately 24,000 feet of sewer pipes.
- Manholes will be rehabilitated or replaced.
- Sewer lateral connections to the rehabilitated main will be reconnected at the sewer easement.
- Vortex will restore areas affected by construction.
- Sewer mains will be rehabilitated using pipe bursting and open cut methods.

Estimated Construction Schedule

- Expected Construction Start Date: August 17, 2026
- Expected Construction Finish Date: April 24, 2027 (Weather Permitting)

Traffic Control

- Please pay close attention to all traffic control devices and signs when approaching a work zone.
- Detours may be in place to safely route traffic around work areas.
- Follow all posted signs and directions.
- Flaggers may be present to help direct traffic safely through the work zone.
- Slow down, stay alert, and give work crews plenty of room.

Work Zone Safety Starts With Paying Attention.

What to Expect During Construction

- Anticipated Work schedule: 7:00 a.m. to 6:00 p.m., Monday-Friday.
- Some weekend work may be required as needed.
- Marking locations of utilities.
- Field Inspections.
- Rehabilitation of sewer mains, manholes and laterals.
- Pavement restoration where digging is necessary.
- Reliable sewer service will be maintained during construction.

Project Summary

- Vortex will be rehabilitating mains, manholes, and some laterals.
- Lateral work will not extend past the easement.
- Vortex will restore all areas impacted by construction activities at the end of the project.
- Hartselle Utilities understands the inconvenience projects like this can cause and appreciates our customers' patience. Vortex fully understands the high expectations HU has for maintaining reliable, respectful service throughout the project.

QUESTIONS?

- Feel free to reach out with any questions at inquiries@hartselleutilities.org or call our main office at 256-773-3340.
